

## PREPARING STUDENTS FOR SUCCESSFUL FUTURES

Delta College is an essential local resource for students of all ages and backgrounds to learn new trades, obtain new skills, and earn affordable college credit they can transfer to the University of California, California State University, and other four-year colleges and universities.

### Training the Local Workforce

Delta College provides low-cost, high-quality education, job training, and community learning options for all residents, and especially some of our more underserved communities. Delta College trains more than 400 health care workers each year to fill critical jobs in our community, such as registered nurses, emergency medical technicians, psychiatric technicians, certified nursing assistants, radiologic technologists, and speech language pathology assistants.

### Local Community College Facilities Are Aging

While Delta College is a valuable part of our community, additional funding is needed to allow Delta College to maintain and upgrade the classrooms, labs, and vocational equipment, technology and facilities for training the first responders, nurses, and other professionals who protect and serve our community every day.

### Local Funding for Urgent Repairs and More Affordable, Local Access to Higher Education

The San Joaquin Delta Community College District Board of Trustees is considering placing a \$733 million school facilities improvement bond measure on the November 2024 ballot that would cost approximately \$19.50 per \$100,000 of assessed (not market) value.

Funding from the measure could be used to help address the most urgent improvements needed across all Delta College campuses, including to:

- Fix old plumbing and continue to provide clean drinking water
- Upgrade classrooms and labs for career technical education programs to prepare students to enter the workforce
- Repair leaky roofs and remove asbestos, lead paint, and mold
- Prepare students to transfer to four-year colleges and universities
- Improve student safety on campus

### Mandatory Accountability and Local Control

By law, a school facilities improvement measure would require strict accountability protections, including:

- All funds would be controlled locally for Delta College improvements only and could not be taken away by the State
- An independent citizens' oversight committee and mandatory annual audits would help ensure all funds are spent as voters intended
- By law, no money could be used for administrators' salaries
- A detailed project list outlining the specific use of funds would be required

### We Want to Hear from You!

As we plan for the future of Delta College, we want to hear your thoughts. Please reach out to Alex Breitler at [alex.breitler@deltacollege.edu](mailto:alex.breitler@deltacollege.edu) with questions or learn more at [DeltaCollege.edu/OurFuture](http://DeltaCollege.edu/OurFuture).
